A barn building system, built for you.

Barn Pros has evolved into the leading national manufacturer of quality designed building and barn packages. For this, we are both proud and grateful.

How did we achieve this?

We have always focused on creating the best barn possible, backed up with the support and service you deserve – something many companies claim, but few actually do.

By investing care and diligence, customers have responded by not only purchasing our barns, but by spreading the word about who we are and what we do. Today, we have more than 1,000 buildings throughout the US, Canada, Europe and Japan.

We understand that building a structure on your property is an important decision. With more than 30 years of experience in construction, we are extremely familiar with what it takes to make your dream a reality.

We're committed to ensuring that your experience building a beautiful, permanent structure is pleasant, rewarding and even fun. This never changes.

We invite you to look through our line of buildings – and also our Barn and Home products. We offer unique, top-quality items to complement your needs and lifestyle.

Thank you for your interest! We look forward to working with you.

Steve Oslund and Jeff Knoth
Barn Pros Founders

We were so amazed and in awe by the beauty of Barn Pros... from the first phone call they were there to help us through the complete process. Other than my children, I would have to say my Barn Pros barn is my pride and joy.

The James family in
Williamston, South Carolina

Dreams made attainable

The structures that truly last have the right foundation. You can see ours in an uncompromising commitment to barns built on quality—and a business built on integrity.

DESIGNED TO BE EXPERIENCED

We engineer our barn-inspired buildings for people. You, to be precise.

Because whether it's your eyes taking in the light pouring in from a loft dormer, the smell of wood greeting you when you open the breezeway doors, or the warmth of spending time with family, friends or your animals, these are structures built around experiences. They start with friendly, expert customer service, include a streamlined process that takes the worry out of your build, and result in a stunning building that will set your property apart. And perhaps that's what's most important—the sense that you've made the right choice for your life, one that will deliver value, peace of mind and delight for years to come.

Architecture

We think the ideal structure is one that simply looks as if it's meant to be there and that's what we strive to achieve with each of our barn-inspired buildings. The harmony of size, scale and detail—from sidewall height to steep roof pitches, breezeway door size to our functional, hand-built cupolas—creates an impression that marries solid and striking.

Options

The dozens of exterior and interior design options available to you—stone, loft upgrades, door and window choices, shed roofs and much more—make it easy to adapt and personalize your Barn Pros structure for regional styles and your own taste. No matter which you choose, all our options are designed to work together and complement each other.

Details

You can see our extraordinary attention to detail everywhere you look. Precisely milled, hand-selected lumber. A unique combination of horizontal and vertical siding, integrating Douglas Fir and Western Cedar. Carefully chosen hardware such as hinges, pulls, and latches, pre-built cupolas, Dutch doors and other premium components created by our own craftsmen.

Efficiency

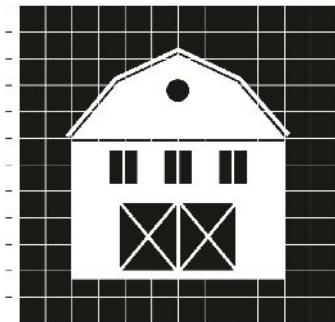

We put a smarter, more streamlined and efficient process at the heart of the way we design barns, and you get the savings and control that come out of it.

We pre-cut and assemble as much as possible before shipping, reducing guesswork, mistakes, and the time you spend building onsite. You can control your costs better by not having to use a different professional —architect, general contractor, supplier, builder—for every stage of the construction process. And our packages include everything from blueprints (you could pay up to \$30,000 for those alone) to lumber and hardware, ready to build—materials not included are nails, concrete, electrical and plumbing, roofing and interior finishes.

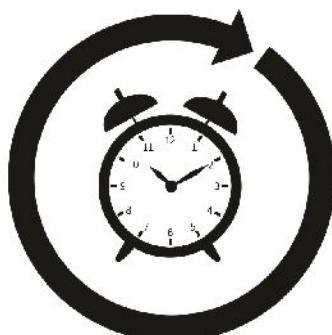

Engineering

Pole-built construction is quite simply a smarter way to build barns.

Our grid-based system makes for a stronger, more beautiful, easier-to-build structure that's also much faster to assemble than a stick-frame building. Posts support the building, so there's no need for load-bearing walls, allowing doors, windows, and dividing walls to be placed where you desire them—and resulting in wide-open spaces perfect for so many living, storage, or professional uses. And because we put so much time and quality control into every part of our process and every piece of our buildings up front, you can be confident that construction will be smoother and more consistent, with less guesswork.

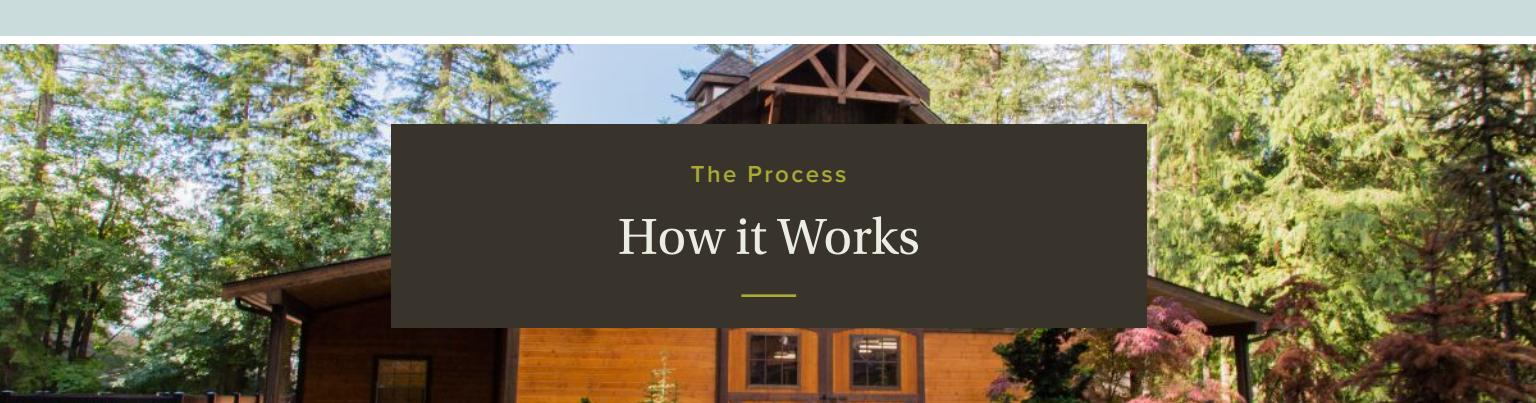

GRID BASED SYSTEM

Speed

At Barn Pros, our smarter, more streamlined process lets us engineer, design, and deliver to you in weeks instead of months, so you're ready to build sooner.

And with pieces that fit better, less to learn, and fewer mistakes in the field, you and your builder will experience a construction process that is as efficient and rapid as it is worry-free.

The Process

How it Works

1 Project Planning and Research

Every project begins with an idea, which soon evolves into a plan. Your new building will require some careful planning and research on your part and we're here to help guide you through this journey. If you're ready to start planning your project, give us a call and ask for a **Pre-purchase Checklist** to guide you through this important phase of your project.

What can I do with my land?

Speaking with an official from your local building department will provide you with information about any land restrictions that may be present for your property. Your building authority will also have guidelines for obtaining building permits, if needed for your location. Likewise, if you belong to any Home Owner Associations (HOA's) or community organizations you will want to verify their specific requirements at this point in your research.

Do I need financing?

Should you require financing for all, or part, of your project, consider contacting your financial institution to research their lending options. Your Barn Pros project specialist can also provide additional resources for financing.

Who will build my structure?

Chances are good that you, or someone you know, has connections to a licensed professional contractor in your area. If not, there are also several online resources and databases that may connect you with a builder. If your inquiries don't turn up any potentials, talk with your project specialist for potential resources they may have.

2 The Right Building for You

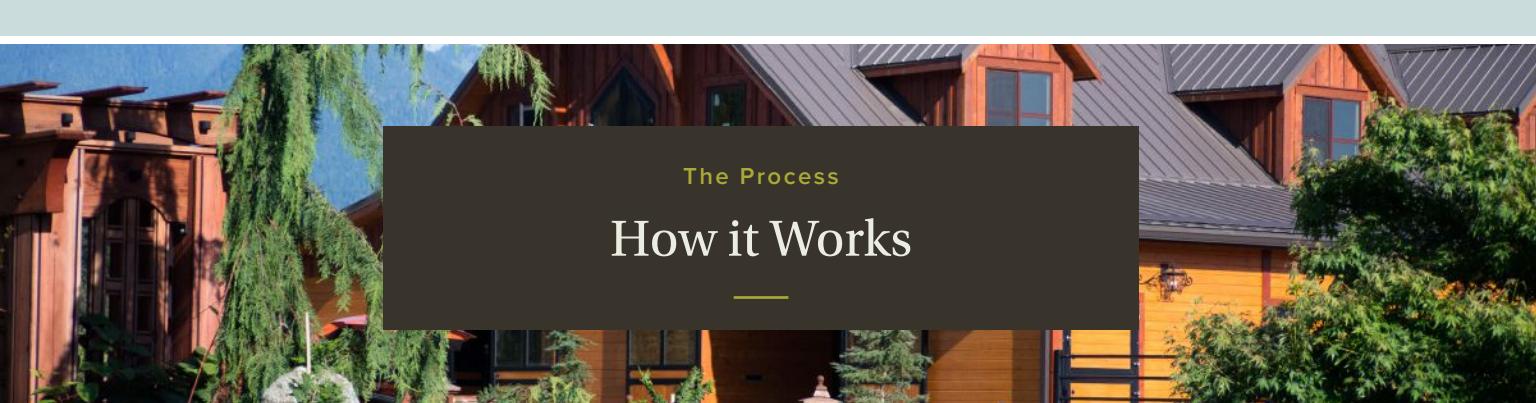

Your project specialist will work with you, and within your budget, to find your perfect building. They will walk you through options in detail to make sure items on your 'wish list' are taken into consideration and that you're confident with the end result - whether your hobbies include horses or horsepower; our multi-use models are designed to offer maximum flexibility for your needs and lifestyle.

What types of buildings can I choose from?

Nearly every building package we provide are multi-use. The full range of models we offer can be broken down into these four categories: **traditional barns, shops and garages** and **barn-style living space**. Each structure provides nearly limitless uses including: variable storage, workspace, vehicle parking, horse stalls, livestock and recreational use – with some models offering residential living as well.

Can I make changes to the building?

We provide a variety of options for your structure that can be combined to create your specific building. Each model choice is designed to work perfectly with the scale, aesthetics and function of your building – guaranteeing a beautiful and unique end result. Your project specialist will work to identify your 'wish list' and translate that into a tailored building to ensure you get exactly what you're looking for.

The Process

How it Works

3 Ordering Your Barn Pros Structure

You will work with your Project Specialist to create your ideal structure which will be reviewed by our engineering team before placing the order to ensure accuracy. After this phase is complete you're ready to place your order and get your blueprints started. At this stage, proper communication and coordination with your build team will help the project get off to a good start.

Finalizing Your Order

When your purchase documents and deposit are received, project details are reviewed with our engineering department where the blueprint process is started. Your project specialist will also work to secure a shipment date with our production team.

Blueprints & Permits

Once the blueprints and engineering calculations packet have been created, you or your builder can begin the permitting process, if required by your building authority. Keep in mind that all other necessary documentation, as dictated by your building authority, may need to be submitted at this time.

Team 'Meet & Greet'

You, your builder and your Barn Pros team will attend a meeting to answer any questions prior to the delivery as well as review delivery details and appropriate contact information. At this point, a **Pre-delivery Checklist** ^① will be provided by your project specialist to assist your build team with the requirements for delivery.

4 Delivery and Build

Everything you've been working towards culminates on your pre-scheduled delivery date. All of the research, planning and preparation you've done has resulted in a perfectly tailored package, engineered specifically to your build site, and backed by the industry leader in pre-engineered, barn-inspired buildings.

Delivery

Prior to the delivery, as per your pre-delivery checklist, ensure there is driveway access to the build site, all required off-load equipment has been arranged and your build team is aware there will be multiple shipments during your delivery timeframe.

Inventory

We put more into our process so that you and your team have less guesswork and wasted time in the field, and a proper inventory is essential to getting your project off to a good start. Taking inventory within a couple days of delivery ensures that the correct product has been sent and that there are no shortages or damaged materials and provides material location for ease of access at each stage of the construction process.

Builder Support

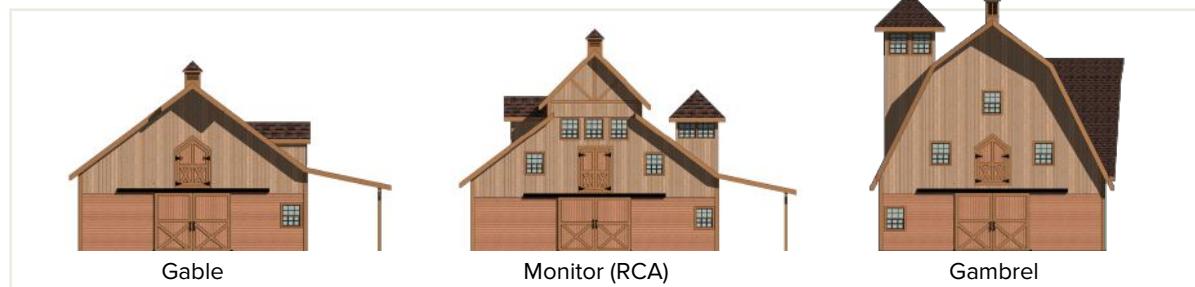

Questions that your builder has before and during the construction process can be directed to our builder support team. We're always ready to help!

^① More information or resources are available - please call and speak to a project specialist.

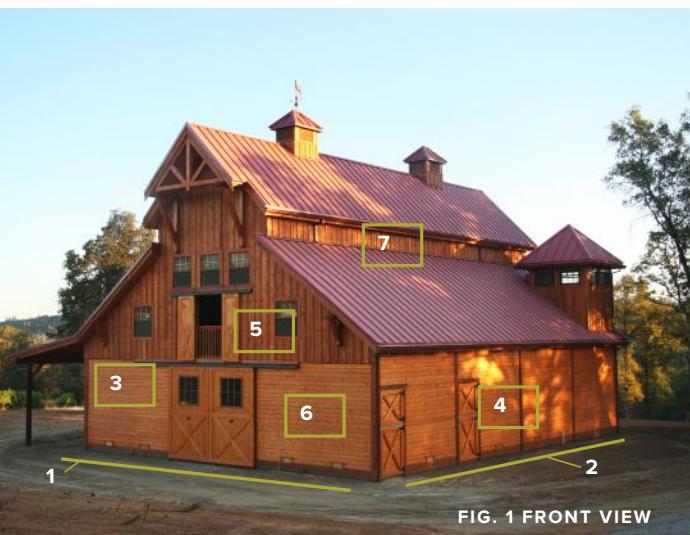

Anatomy of a Barn

Throughout this catalog, we will refer to different aspects of our structures to illustrate how each is unique. You will find a number of helpful terms below that will become especially handy when talking through your project needs. If you have questions about anything that you can't find on this page, don't hesitate to give us a call.

ROOF STYLES

E	Tackroom with stairs to loft
F	Loft floor (full loft shown)

Anatomy of a Barn

POST FRAME CONSTRUCTION

Post-frame (or pole-frame) construction has been used for centuries and is a leading construction style that provides an efficient way to build strong, long-lived buildings. For Barn Pros' engineered kits, this involves using pressure-treated (PT) posts, encased in concrete, to provide structural support. A key value post-frame construction offers is flexible design and function, which allows for one building to have a multitude of uses.

Post-frame with rafter construction uses posts throughout the building (based on a grid) that support the roof system and provide the structural strength of the building. This method is used in the majority of our models.

Post-frame with clear-span truss construction uses posts on the perimeter walls only, creating open space throughout the building. Here, the trusses support the roof system and provide structural strength for the building. This construction method can be found with our clear-span riding arenas as well as several shop and garage models.

POST LOCATION: IN GROUND VS. ABOVE GROUND

With the exception of residential models, **in-ground post construction** (see fig.1 right) is the standard method for our buildings. In this setup, pressure treated structural posts are buried in the ground encased in concrete. It should be noted that while a concrete slab is not required for this setup, it is the preferred treatment.

Also offered is the option for **above ground post construction** (see fig.2 right) to accomodate geographical conditions such as a high water table, bedrock below grade or high seismic engineering criteria. Other reasons for opting to this method may include siding type or personal preference. In this setup posts are anchored to a concrete slab and stud-walls are added to the building for horizontal stability.

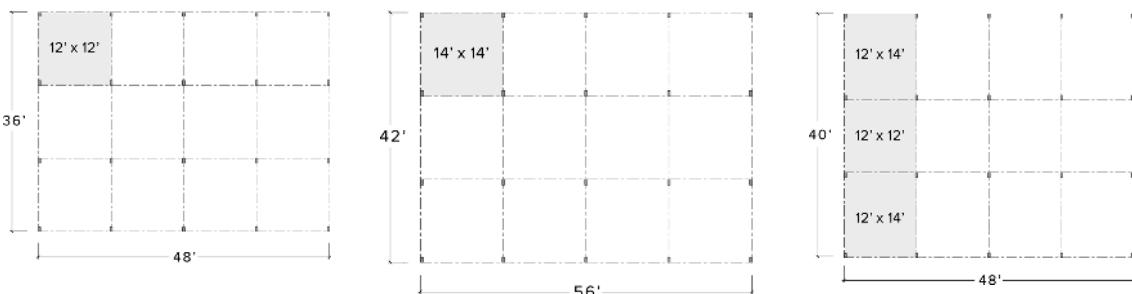

1. In-ground post construction

2. Above-ground post construction

DESIGNED ON A GRID

Our buildings are designed using a pre-determined grid layout of 12'x12' or 14'x14'. Typical building widths are 24', 36' and 42' with lengths offered in increments of 12' or 14' based on the grid layout used. Some 12' x 12' grid models may accommodate 12' x 14' grids on the outer sides of the building allowing for 12' x 14' bays (see below right).

Olympic

OFFERING AN OPEN LOFT

Building sizes:

36' x 24', 36', 48', 60', 72'

Looking for information about this building kit?

Find complete pricing, floor plan drawings, building specifications and images online at:

www.BarnPros.com

If you're looking for flexibility of use, this model is for you. The Olympic easily accommodates horse stalls for a traditional barn setup, garage doors for vehicle and equipment storage and a shed roof that can be enclosed for additional storage space. Here are some of the Olympic's top features:

Gable style roof dormers with windows

Full-length open shed roof standard; optional upgrade packages include partial or fully enclosed shed roof, as well as dual shed roofs

Classic 9/12 roof pitch, creating ample headroom and storage in loft

12'6" sidewall height

12' wide open breezeway

Full-length, 12'-wide center loft standard; optional upgrade packages include a 2/3 (24'-wide) or full-width loft

Tack and feed room with stairs leading to loft

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware, one (1) set of handmade hayloft doors

Select-grade 2" x 6" Douglas fir tongue and groove walls

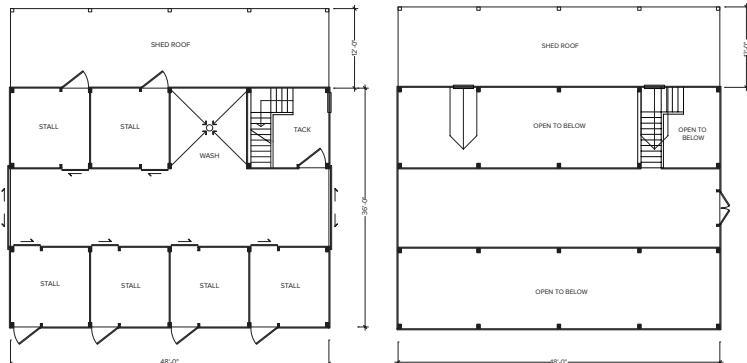

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Photos may have options not included in standard packages.

OLYMPIC 48 (lower and upper)
Additional drawings available online

The Olympic includes a 9/12 roof pitch for a tall and generous hayloft so you can observe or feed your horses from above.

Stall packages are optional – customize your barn to your needs! Our post-frame design allows you to build without interior walls.

Optional 12'x12' stall packages include:
Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Cascade

CLASSIC SIMPLICITY

The Cascade barn provides style and simplicity in a traditional look. It retains the same classic roof pitch as the Olympic model with a simple roofline void of dormers, a full-length center loft and lower sidewall height.

Classic 9/12 roof pitch, creating ample headroom and storage in hayloft

10'6" sidewall height

12' wide open breezeway

Full-length, 12'-wide center loft

Tack and feed room with stairs leading to loft

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware, one (1) set of handmade hayloft doors

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

The Cascade includes a 12'-wide center loft allowing you to observe or feed your horses from above.

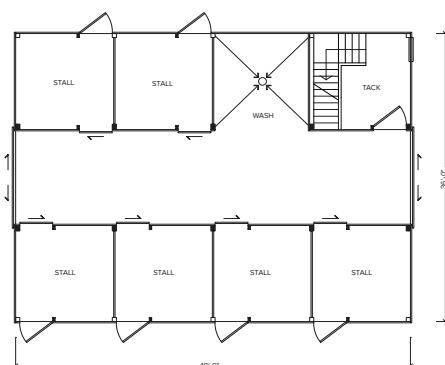

The Cascade model shown above is located in Snohomish, Washington and includes an optional shed roof and additional windows.

Optional 12'x12' stall packages include:

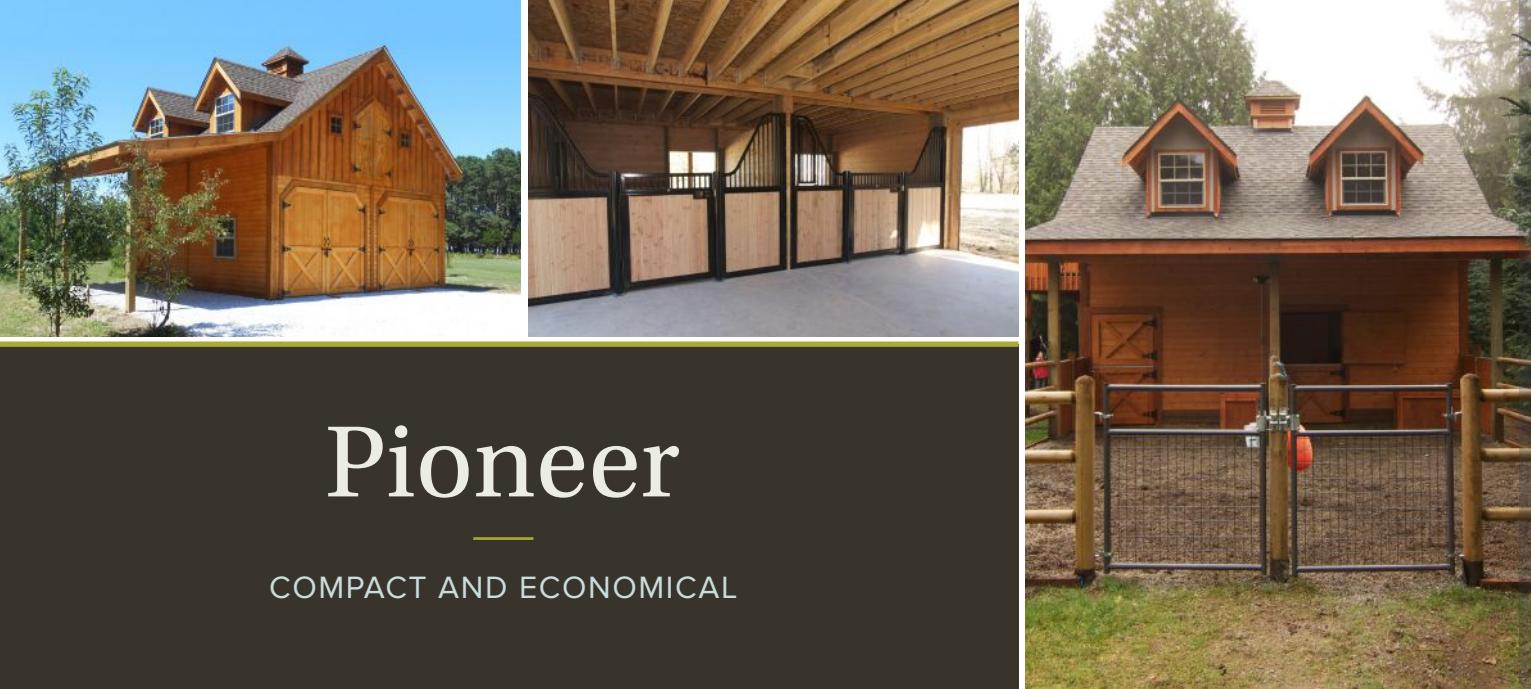

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

CASCADE 48
Additional drawings available online

Crossnore School and Home, located in North Carolina, hosts an equine therapy program for their students in a Barn Pros Cascade barn.

Pioneer

COMPACT AND ECONOMICAL

Building sizes:

24' x 24', 36', 48', 60', 72'

The Barn Pros Pioneer provides a quality gable-style barn in a modest, economical package. It features a full loft with generous headroom from the 9/12 roof pitch, making an ideal space for storage or recreation. If you are looking to personalize the standard offering, consider an upgraded version with dormers and a shed roof (shown below right).

Classic 9/12 roof pitch, creating ample headroom and storage in hayloft

12'6" sidewall height

8'9" wide open breezeway

Tack and feed room with stairs to loft

24' wide full loft

Handmade Douglas fir breezeway door with sliding track hardware and handmade hayloft door set

Functional handmade cedar cupola

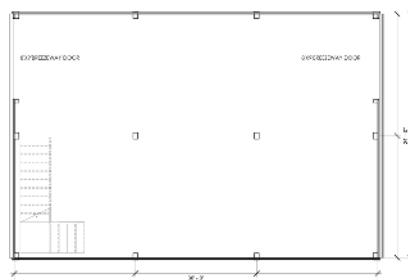

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Images above display optional shed roof, dormers, horse stall packages and garage door package upgrades.

PIONEER 36
Additional drawings available online

Looking for a small apartment? The new Huntington model is a 24' x 36' barn with living space above a garage or horse barn.

Looking for more information about these building kits?

Find complete pricing, floor plan drawings, building specifications and images online at: www.BarnPros.com

Optional 12'x12' stall packages include:

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Cimarron

RANCH-STYLE SHEDROW BARN

Building sizes:

24' x 24', 36', 48', 60', 72'

The Cimarron is an economical way to meet your horses needs. This barn style is a great choice for warm weather climates that typically require maximum ventilation. Optional 12'x12' stall packages include: Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Full-length open shed roof

Prairie-style 5/12 roof pitch

8'6" sidewall height

12' wide open breezeway

Tack and feed room

Functional handmade cedar cupola

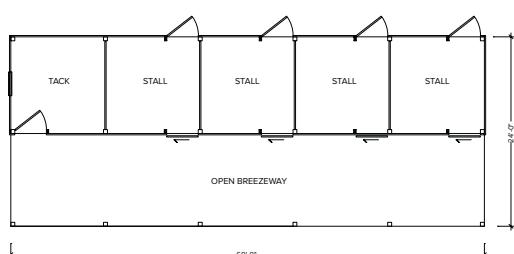

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Photos may have options not included in standard packages.

Images above reflect some
optional upgrades not
included in base models
such as: full tongue and
groove siding, secondary
shed roofs, horse stall
packages and breezeway
doors with windows.

The High Sierra barn model with its low roof pitch, blends beautifully with a wide-open field. The high sidewall allows for expansive headroom, maximum storage and increased airflow and ventilation. The shed roof may be fully or partially enclosed for additional square footage and a second shed roof may also be added.

Full-length open shed roof standard; optional upgrade packages include partial or fully enclosed shed roof, as well as dual shed roofs

Prairie-style 5/12 roof pitch

12'6" sidewall height

12' wide open breezeway

Tack and feed room with stairs to loft

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

The High Sierra's open shed roof provides storage, extra parking or turnouts for your horses. Shed roofs may be fully, or partially enclosed for additional square footage.

The High Sierra is open from floor to ceiling and can accommodate everything from horse stalls to tractors. Add a garage door for easy access to farming equipment.

Optional 12'x12' stall packages include:

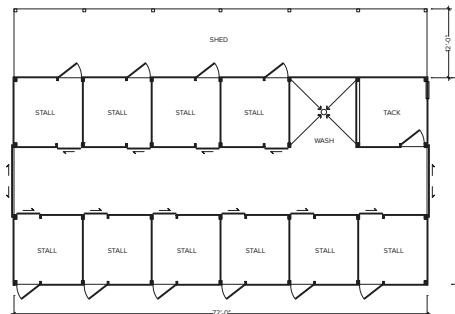

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts. Shown above: drop-down style stall door.

Breezeway doors can be mounted to slide open and apart, or together and to the side. Shown above, these doors open to the right to accommodate a garage door to the left.

Customer Spotlight

Equestrian 72'

WASHINGTON STATE

Off the beaten path, within the foothills of the Cascade Mountains, you'll find an Equestrian 72 horse barn tranquilly providing the roots that one family desires. The first floor has all the best that Barn Pros has to offer for horses while the second floor has a classic clubhouse vibe with a full wet bar and pool table. This is truly a barn built for the entire family.

Personalizations:

Cedar board and batten siding at gable ends	Classic breezeway doors, Dutch doors and hayloft doors
6' gable style roof dormers	Horse stall packages
Lighthouse and jumbo cupolas	Complete wash bay package
Front end Timber Truss package	Fencing package
Two-thirds loft	Candy Apple Red barn lights (above stalls)
Pine-wrapped ceilings and interior walls	Copper barn lights (in loft)

I made the mistake of saying, "Wouldn't it be nice to have a small property here and build a little cabin?" And the rest is history as they say." The owner, Steve, told us this during an interview on one sunny summer day as they were finishing the construction of their property. This barn is just one of a handful of structures on their sprawling hillside property and for him and his wife, it represents so much more than just a horse barn. They are putting down their roots in a region they've grown to love and building something their whole family can call home.

His wife, Jackie, told us, "I travelled a lot as a child and he travelled throughout his career so we wanted to be the ones that didn't move and everybody could come to us." The evolution of this structure from wanting just a small cabin on a plot of land to something they are lovingly referring to as The Compound, was entirely driven by their desire to build a physical place that their entire extended family could participate in. While some families are always looking for the next tropical paradise, Jackie and Steve wanted to build a place that has more substance to it. They wanted to carve out a space that reflected what they have always sought out in their lives which has the feel of an old-world community where you know the owners of the meat market down the street and you can cook right from your own garden.

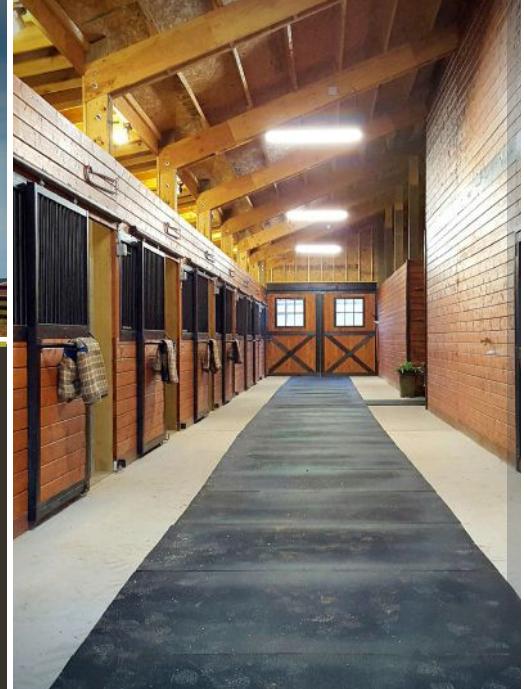

Our barns may be pre-engineered but they provide all the flexibility that you need to make it unique to you and your family. "The final goal is that it is a reflection of the people that you love. It is a reflection of yourself, of your passion." For Jackie and her daughter, horses are a particularly vibrant passion so they needed a space where they could fully pursue it, but Steve and many of their other family members are much more interested in simply relaxing with a game of poker or pool so the spacious loft was built with this in mind.

This towering 60'x 72' showcase barn with a 10'6" sidewall height has been appointed with the best that Barn Pros has to offer for horses. The exterior not only features sizable Northwest cedar standard and lighthouse cupolas, but also a timber-truss and corbel package on the front gable ends, in addition to the included Northwest cedar board and batten siding on gable ends around the barn. The double-breezeway setup is ideal for high-capacity horse-boarding, supplying 12 horse stalls plus a double (12'x 24') tack room and wash bay. Several of the expansive horse stalls have a swinging divider wall so that two stalls can be joined as one for larger breeds or as a birthing stall. Jackie and her daughter have everything they need to fully pursue their equine passion.

And while they are busy with the horses, Steve can escape to the 2/3 partial loft to enjoy the lively recreation area with a wet bar, pool table and flat screen TV, illuminated by hand-made copper light fixtures. All the walls and ceilings are lined with our tongue and groove paneling for a classic look, while the posts throughout are wrapped in cedar for a nice contrast. Steel-framed and powder-coated Classic quad-glass breezeway and hayloft doors with wood fill continue the rustic feel throughout the barn. A small room at one end was also built with a loft bed so that the grandchildren have a place of their own to escape to.

In summary, it is immaculately designed to reflect their tastes and personality. "It's very family centered. It is children, grandchildren, extended family and friends that are attracted to this." They wanted to have a little something for everyone whether they love horses, poker or simply want to reconnect with a more rural spirit. These are people that long for the past. They want to get out of the rat race. They've been working all their lives. They are really just trying to get back to their roots. In our fast-paced modern world, everyone can use a reminder of what truly brings joy into their lives and where they come from. Steve and Jackie have worked hard to build a place where joy can flourish for generations.

Grand Sierra

DOUBLE BREEZEWAY, OPEN TO CEILING

Building sizes:

60' x 48', 60', 72', 84', 96'

The Grand Sierra is a 60 foot wide, double breezeway barn with plenty of horse boarding capability. The low, 5/12 prairie-style roof is modeled after our Sierra line and offers a subtle profile. The absence of a loft is a convenience for those who prefer to keep feed and storage items on the floor level and the vaulted ceiling provides increased ventilation.

Prairie-style 5/12 roof pitch

10'6" sidewall height

Double breezeways, 12' wide each

Expanded (double) tack and feed room

Four (4) handmade sets of Douglas fir breezeway doors with sliding track hardware

Functional handmade cedar cupola

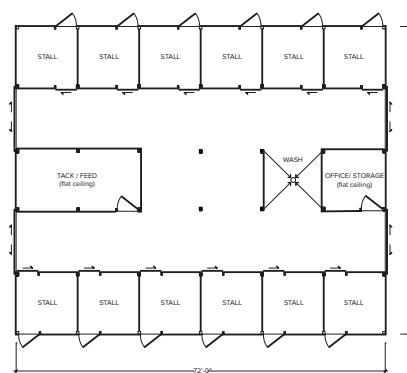

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Grand Sierra shown with optional upgrades including horse stall packages, wash bay package, additional cupolas, lighting and breezeway doors with windows.

Stall Count - Equestrian & Grand Sierra models

48'	8 stalls
60'	10 stalls
72'	12 stalls
84'	16 stalls
96'	20 stalls

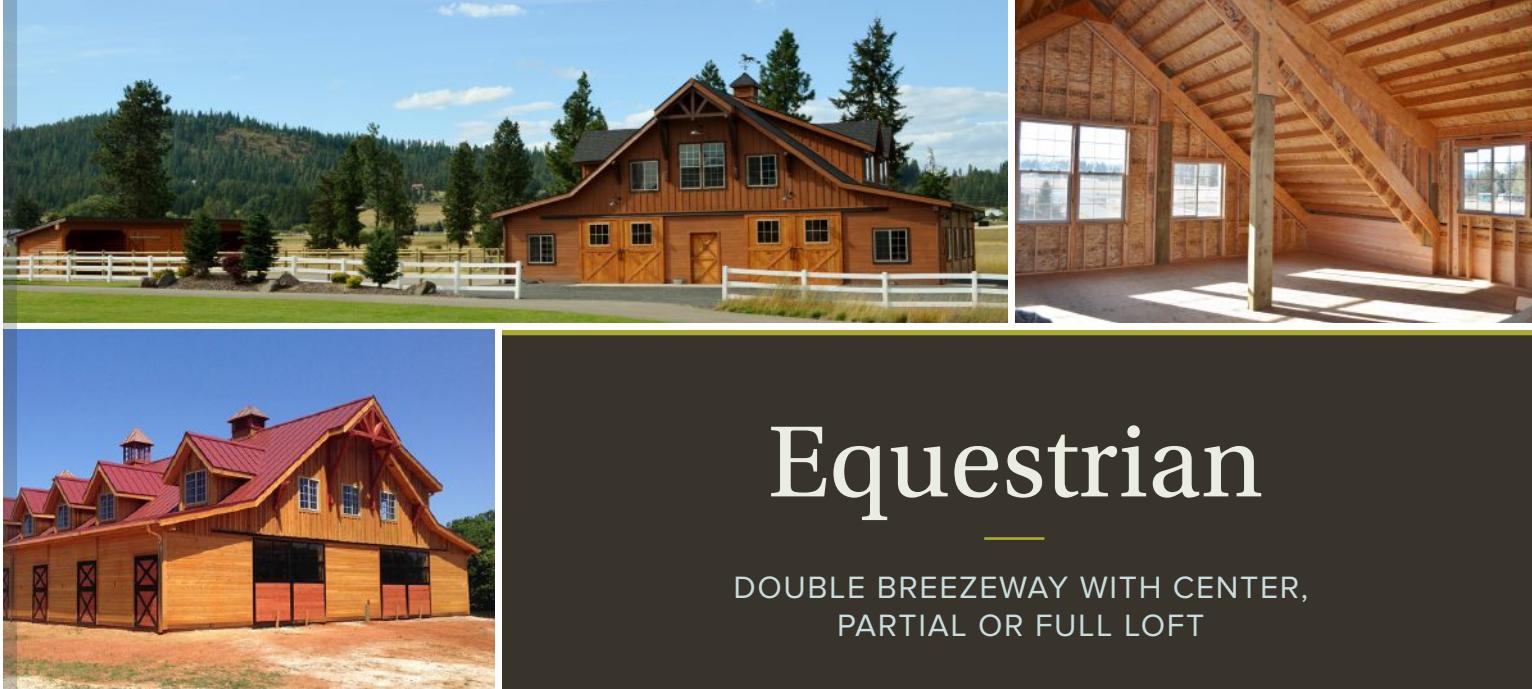

Optional 12'x12' stall packages include:

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Equestrian

DOUBLE BREEZEWAY WITH CENTER,
PARTIAL OR FULL LOFT

EQUESTRIAN 96
Additional drawings available online

The Equestrian barn shown above has a fully lined ceiling with high bay lighting, Classic stall fronts and breezeway doors.

Building sizes:

60' x 48', 60', 72', 84', 96'

The Equestrian model offers the same double breezeway layout and ample horse boarding capacity as the Grand Sierra. Where it differs is the expansive loft and optional dormer styles for added natural light. Here are some additional features:

Classic 9/12 roof pitch, creating ample headroom and storage in hayloft

10'6" sidewall height

Double breezeways, 12' wide each

Full-length, 12'-wide center loft standard; optional upgrade packages include a 2/3 (24'-wide) or full-width loft

Expanded (double) tack and feed room with stairs leading to loft

Four (4) handmade sets of Douglas fir breezeway doors with sliding track hardware, one (1) set of handmade hayloft doors

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Images above display optional upgrades that include: roof dormers, cedar board and batten siding, timber truss, horse stall packages and a full loft

Clydesdale

SPACIOUS ELEGANCE

Building sizes:
42' x 28', 42', 56', 70', 84'

Looking for

floor plan drawings,
building specifications
and images online at:
www.BarnPros.com

Images at top reflect optional
model upgrades including: cedar
board and batten siding, garage
door package, lined ceiling and
interior walls, additional cupolas.

The Clydesdale model is the perfect barn to care for animals, farm equipment and work on projects or hobbies. Designed on a 14' x 14' grid this building allows for larger stalls and a wider breezeway – spacious enough for a "drive thru" area for tractors, trucks or recreational vehicles (RV's). The center aisle stands taller than the roof 'wings' to each side creating a clerestory area where windows for natural light. With an expanded footprint, soaring 35-foot peak-roof line height, stairway silo and full loft, this barn will add beauty and functionality to your property.

Raised Center Aisle design

Gable style roof dormers with windows

Full-length open shed roof standard; optional upgrade packages include partial or fully enclosed shed roof, as well as dual shed roofs

Classic 9/12 roof pitch, creating ample headroom and storage in hayloft

12'6" sidewall height

14' wide open breezeway

42' wide full loft

8' x 8' silo

Tack and feed room with stairs leading to loft

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware, one (1) set of handmade hayloft doors

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

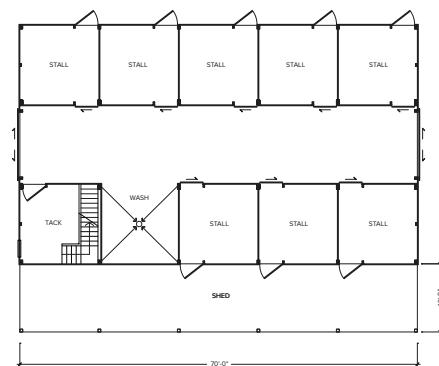

Optional 14'x14' stall packages include:

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

This Clydesdale 70 in Leesburg, VA is part of the Stone Tower Winery estate and serves as a tasting room and event venue.

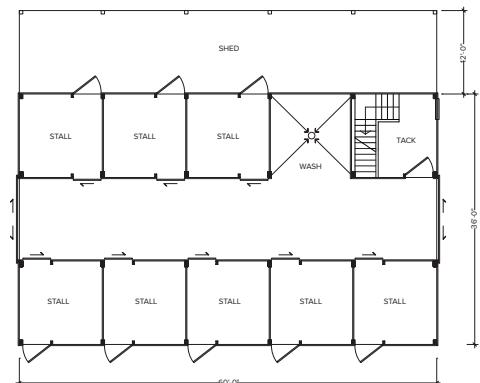

Teton

MONITOR BARN VALUE PACKAGE

Building sizes:

36' x 24', 36', 48', 60', 72'

TETON 60

Additional drawings available online

Looking for more information about these building kits?

Find complete pricing, floor plan drawings, building specifications and images online at: www.BarnPros.com

The Teton has all the grace and beauty of larger monitor barns at an excellent value. This barn model includes standard pre-built hayloft doors, breezeway doors, a tack room and two aesthetically-pleasing 2'x2' windows at the front gable. The raised-center-aisle design accommodates clerestory windows for additional light.

Raised Center Aisle design

Full-length open shed roof standard; optional upgrade packages include partial or fully enclosed shed roof, as well as dual shed roofs

Traditional 7/12 roof pitch

12'6" sidewall height

12' wide open breezeway

Full-length, 12'-wide center loft standard; optional upgrade packages include a 2/3 (24'-wide) or full-width (36'-wide) loft

Tack and feed room with stairs leading to loft

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware, one (1) set of handmade hayloft doors

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

Images above show optional upgrades that include: additional and/or enclosed shed roofs, roof dormers, cedar board and batten siding, front end timber truss and horse stall packages.

The Sierra Monitor combines the traditional look of a raised-center-aisle (RCA) barn with the low roof pitch commonly seen in the southern states. The absence of a loft creates open space from floor to ceiling, increasing air circulation and improving ventilation. Clerestory windows along the lower roofline provide natural light into the barn. The result is an attractive, value-priced barn that will thrill horse owner and hobby farmer alike.

Raised Center Aisle design

Prairie-style 5/12 roof pitch

9' sidewall height

12' wide open breezeway

Tack and feed room

Two (2) handmade sets of Douglas fir breezeway doors with sliding track hardware

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

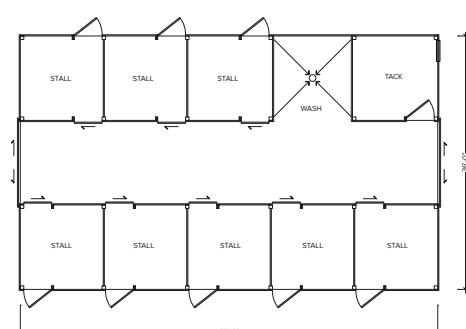

Optional 12'x12' stall packages include:

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Images above reflect optional upgrades that may include: horse stall packages, wash bay and custom doors.

Images at top reflect optional
model upgrades including: cedar
board and batten siding, garage
door package, lined ceiling and
interior walls, additional cupolas.

Our Meadows arena series provides a safe, pleasurable riding experience for both horse and rider with open, vaulted ceilings and steel clear span roof trusses. A five-foot rub rail surrounds the arena, comprised of our premium-grade Douglas fir tongue and groove lumber. Access to the arena surface is made through a pre-built 5' x 12' wooden gate. For a full equestrian facility setup, we offer the Club addition. This fully enclosed, 24' wide lean-to accommodates horse stalls, tack room with door, grooming bay and storage areas. The Meadows arena is available in both 60' and 72' widths, with lengths from 120' to 240'. The Club addition may be added to one, or both sides of the building and are available at a 24' width, with lengths from 96' to 120'. These models currently not available in Canada or the state of California.

60' or 72' clear span steel trusses

16' sidewall

Covered gable ends

2 x 6 tongue and groove rub-railing (5' tall all around)

Pre-built 5' x 12' double-swing arena gate

Two 4' x 5' man gates

Site-specific state stamped blueprints and engineering packages

**Optional 24' x 96' Club addition includes:
exterior cedar trim package, six complete
horse stall packages*, groom bay, tack room,
12' x 96' breezeway and one 5' x 12' double-
swing gate for access to arena surface.**

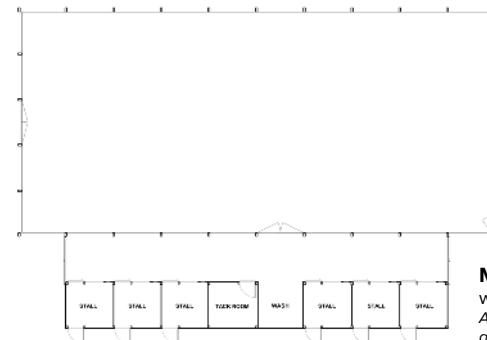

Arena and Club addition available in multiple lengths

Complete 12' x 12' stall packages include: Barn Pros heavy-duty powder-coated galvanized fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

You can choose to keep the building open, or create a fully enclosed space for year-round riding comfort with the addition of select siding.

Huntington

BARN APARTMENT LIVING

Building size:

24' x 36'

Call to receive a complimentary Huntington e-brochure!
Includes all 9 floor plans, detailed model information with kit specifications, drawings and option packages.

Similar to our Denali, the Huntington apartment model uses a smaller footprint (24' x 36') to offer up to 864 sq. ft. of living space in the loft with the option for storage, garage and equine space below. Three models (A, B, and C) are offered with a total of nine studio floor plan designs to choose from.

The lower floor is designed to offer flexible, multi-use space functioning as a traditional garage for vehicles, two-stall horse barn, and workshop or storage area. This model also includes a full-length shed roof that can function as a covered entry, vehicle parking and additional storage. Shed roofs can be fully or partially enclosed for additional square footage.

Consider adding the Huntington for guests or a caretaker, as an art or hobby studio, or an addition to your vacation property for convenient storage and a weekend retreat.

HUNTINGTON MODEL A - Two 6' gable dormers, one 36' shed dormer

HUNTINGTON MODEL B - One 12' gable dormer, one 36' shed dormer

HUNTINGTON MODEL C
Two 36' shed dormers

8' or 12' wide open shed roof standard, optional upgrade packages include partial and fully enclosed shed roof, as well as dual shed roofs.

Classic 9/12 roof pitch

12'6" sidewall height

Handmade Douglas fir breezeway door with sliding track hardware and handmade hayloft door set

Handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Apartment Roof System

2" roof purlins (for customer-supplied spray-foam insulation)

1/2" CDX roof sheeting

Interior Apartment Walls

Included floor plan

Stud walls

Multiple Apartment Floor Plans

Upper floor apartment engineered to meet code as dwelling

Includes state-stamped blueprints and engineering calculations.

Fire-Rated Apartment Entry Door

Solid core fire-rated door

Vapor-Barrier House Wrap

Multiple Dormer Packages

One (1) full-length, shed style roof dormer on one side and either two (2) 6' gable style (Pkg. A), one (1) 12' gable style (Pkg. B) or one (1) full-length shed style dormer (Pkg. C) on the other.

Make it Yours - additional options

Upgrade your building with these packages to make it your own.

Equine Package: includes stall fronts, divider walls, mats, Dutch door turnouts and chew protection

Garage Package: includes insulated roll-up doors in several designs

Optional 12'x12' stall packages include:

Barn Pros heavy-duty powder-coated galvanized stall fronts, chew protection, solid rubber stall mats and Dutch door turnouts.

Three floorplans are offered for each of the three models, giving a total of 9 layouts to choose from. Shown above is Huntington Package A, option 1 which includes one bedroom one bath, one full-length shed roof dormer, two 6' gable dormers.

Denali

BARN APARTMENT LIVING

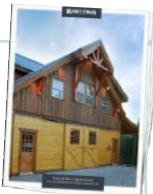

Building sizes:
36' x 36', 48', 60', 72'

Looking for more information about this building kit?

Find complete pricing, floor plan drawings, building specifications and images online at: www.BarnPros.com

Call to receive a complimentary Denali model e-brochure!

Over 65 pages - includes all 16 floor plan designs, detailed model information with kit specifications, drawings and model option packages.

The Denali Apartment Barn has been engineered with residential use in mind so you don't have to worry about whether it will meet the strict residential codes for your area. Our team of professional drafters, engineers, designers and architects have created a building kit that is residential-ready to save you the cost of hiring all of these experts individually.

The building has a 9/12 roof pitch with 20" overhangs and an insulation-friendly roof system. There is 10' of clear space below the loft meaning higher ceilings on the first floor for more convenient storage of vehicles, boats, tractors, horses or anything else your heart desires.

The living space is designed to be functional and beautiful with a spacious interior and work space. We have included compelling floor plans that offer a modern living space while maintaining flexibility for your needs. Also provided are multiple roof dormer packages that coordinate with these floor plans - maximizing open space throughout the apartment, bringing in natural light and adding architectural detail to your home.

Find the floor plan that works for your individual needs. The Denali apartment includes several living area options to enhance the unique roofline and rustic details of your barn-inspired home.

The 48' Denali apartment above includes these optional upgrades: cedar board and batten siding, front end timber truss and corbels, breezeway doors with windows, lined ceilings and walls in apartment.

Denali 36' Barn Apartment model above shown with optional upgrades including a partially enclosed shed and garage doors.

Apartment Roof System

- 2" roof purlins (for customer-supplied spray-foam insulation)
- 1/2" CDX roof sheathing

Interior Apartment Walls

- Included floor plan
- Stud walls

Multiple Apartment Floor Plans

- Upper floor apartment engineered to meet code as dwelling
- Includes state-stamped blueprints and engineering calculations.

12' x 12' Cedar Deck Pkg. (rear gable end)

- 2" treated joists
- 5/4" x 4" tight knot cedar decking
- 2" x 2" cedar picket hand rail

Gable-End Exit Door to the Deck

- 6'0" x 6'8" sliding patio door

Fire-Rated Apartment Entry Door

- Solid core fire-rated door

Vapor-Barrier House Wrap

Multiple Dormer Packages

- Dormer configurations coordinate with provided floor plans to maximize living space and create an attractive building.

Make it Yours - additional options

Upgrade your building with several packages to make it your own.

- Equine Package:** includes stall fronts, divider walls, mats, Dutch door turnouts and chew protection

- Garage Package:** includes insulated roll-up doors in several designs

- Upgraded Deck package:** timber-style 12'x12' deck cover and extended deck available.

- Timber Accents:** front gable end timber truss and corbels, timber-style 12'x12' deck cover.

The living area of the Denali uses an open floorplan layout to highlight the vaulted ceilings and grand scale of the building.

Over 65 pages - includes all 16 floor plan designs, detailed model information with kit specifications, drawings and model option packages.

Our commitment to making your dreams attainable shines brightest in our Denali barn apartment line. Whether your passion involves horses, classic cars or other hobbies, we believe you deserve a structure that is more than just four walls and a roof. When you build a Denali, you aren't just building a barn. You are investing flexibility into the future of your property to go wherever life takes you.

We have engineered the most requested customizing into the standard structure to make it even more efficient and affordable for you. With 10' of clear space below the loft, higher ceilings on the first floor offer convenient storage.

Included are compelling apartment floor plans that offer modern living space while maintaining flexibility for your needs. You can choose from several professionally designed floor plans for the living space, with some packages offering a 'bunk house' style setup ideal for several guests.

Find the floor plan that works for your individual needs. The Denali apartment includes several living area design options to enhance the unique roofline and rustic details of your barn-inspired home.

D; with 8 guest bedrooms and 3 guest baths – the perfect bunkhouse setup for a vacation retreat.

Rainier

BARN STYLE HOME

Building size:
24' x 36'

Looking for more information about this building kit?

Find complete pricing, floor plan drawings, building specifications and images online at: www.BarnPros.com

The Rainier is a two-story barn style home with modern floorplans and up to 1,500 square feet of living space. Two models (A and B) are offered with either a two, three or four-bedroom setup with options for the master suite on the main level. The living space is designed to be functional and beautiful while providing flexibility for your needs. This home has been engineered as a full residence by our team of professional drafters, engineers and designers to save you the cost of hiring these experts individually.

When selecting this home, you will be able to choose from three main floor designs and four upper floor designs. Each of these layouts have been created to work together so that you can mix-and-match to find the best options for your needs. If you are looking for vehicle parking within the same building, consider enclosing a shed roof to use as a carport. If a detached garage is more to your liking, see our selection of garages and shops starting on page 36.

Call to receive a complimentary Rainier Home e-brochure! Includes all floor plan options, detailed model information and kit specifications.

Upper floor living space is designed to accommodate two to three bedrooms, 1-2 bathrooms and laundry room.

Tradesman shown above with
optional upgrades including: cedar
board and batten siding, breezeway
doors and an additional cupola.

Built with clear span trusses, the Tradesman's open shop design is great for working or storing. Designed with three door openings on the front end of the building for your choice of roll-up garage doors or our handmade breezeway barn doors. The tongue and groove siding is the same beautiful "Select Grade" Douglas Fir wood used on all of the Barn Pros series barns. Consider adding a shed roof on one or both sides for additional storage space. Our Tradesman shop includes:

Clear span scissor trusses

7/12 roof pitch

14'6" sidewall height

Two (2) steel personal entrance doors

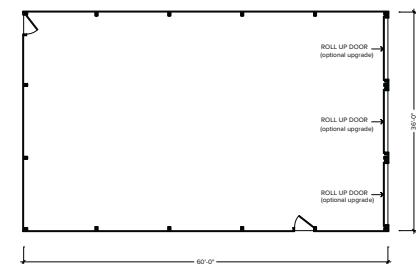

Functional handmade cedar cupola

Select-grade 2" x 6" Douglas fir tongue and groove walls

Exterior cedar trim package

Site-specific state stamped blueprints and engineering package

Multiple lengths available

TRADESMAN 60

Three, 14'-wide storage bays provide storage for RV's, trailers and boats, vehicles and various other implements and equipment. Garage door packages available, see page 80 for selection.

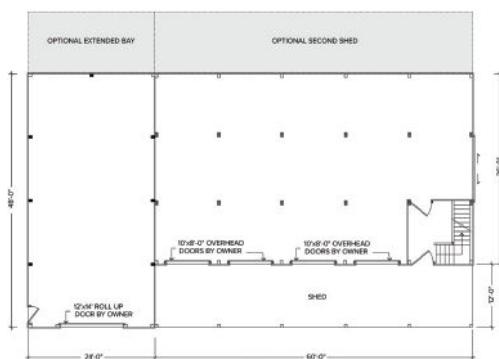

Retreat

BARN AND SHOP COMBINATION

Building sizes:
36' x 60', 72', 84'

The Retreat is a versatile combination structure designed to house multiple vehicles and provide ample workspace and storage space for all your hobbies and pursuits. A 24'x48' fully enclosed RV parking bay with 18' sidewalls and a clearspan truss roof structure is large enough for the grandest of RV's. An additional two, three or four vehicle bays are featured in the "barn" section of the structure which also includes a well-lit full loft – a perfect space for an office, recreation space or additional storage. Model shown with optional roll-up garage door package, see page 74 for details.

Model Options

Your Barn Pros building can be tailored to meet your specific requirements for appearance, storage and function with the following option packages. Additional accessories can be found online at: www.BarnPros.com

Wood Siding

The standard siding included with our models consists of: rough sawn fir with Northwest cedar battens on the upper gable ends and select grade Douglas fir tongue and groove on the lower gable ends and sides. This combination mimics the look traditional board and batten while being more cost-effective by comparison.

Cedar Board & Batten with Douglas Fir T&G

A popular upgrade would include premium Northwest cedar board and batten on the upper section and select Douglas fir tongue and groove on the lower half.

Douglas Fir Tongue and Groove

For those partial to the warm tones and strength of Douglas fir, choose a full horizontal wrap of our select tongue and groove for a seamless treatment.

Northwest Cedar Board & Batten

The appeal of cedar siding is well-known and a full wrap of our premium Northwest cedar in a board and batten style makes a great first impression.

Pre-finished Wood Siding

Pre-finished Siding – Kiln-dried and finished with a no VOC sealant, our selection of pre-finished siding material offers a distinct style that enhances the beauty and texture of wood while providing long-lasting protection, low maintenance and an environment friendly product.

Ranchwood – The weathered appearance of reclaimed barn wood combined with the strength of a kiln-dried, stable material makes Ranchwood a cost-effective option for an ageless look.

AquaFir – This Douglas fir substrate material is available in several semi-transparent tints to color the product just the way you want. Siding options include board and batten as well as tongue and groove to mimic the Barn Pros signature look.

For more information about our pre-finished siding options, visit the Resource section of our website.

Soffit Linings

Soffit Linings – The standard model offering includes exposed soffits with the option to add a lining of either pine or Douglas fir tongue and groove for a continuous wood-wrapped look.

Timber Accents

Timber Truss Package – This handmade, decorative detail lends the traditional look to any barn. A full Douglas fir stylized truss accompanied by sturdy, Doug fir outriggers (or corbels) creates this package. Add to the front, or both ends, of your building.

Model Options

Your Barn Pros building can be tailored to meet your specific requirements for appearance, storage and function with the following option packages. Additional accessories can be found online at: www.BarnPros.com

Dormers

Roof dormers are provided to enhance your barn's appearance, add more light into your building and provide additional headroom to the loft. Our dormer styles include: gable, shed and Nantucket; a variation of the shed style. Larger barns benefit from multiple dormers and choosing different styles for each side of your barn can add visual interest and a more dynamic layout to the loft area.

GABLE DORMERS

Choose from five widths and multiple combinations.

4ft

6ft

8ft

12ft

24ft

SHED ROOF DORMERS

Available in 12' and 14' increments (based on model grid), these dormers are offered in partial and full-length.

NANTUCKET ROOF DORMERS

Available in 12' and 14' incremental lengths (based on preset model grid), these dormers include exterior eyebrow details.

Shed Roofs

Shed roofs provide space for covered horse turnouts, vehicle parking, storage, entertainment space and a larger footprint if enclosed. Garage doors, personal entry doors or breezeway doors can be added for multiple access points. Consider a partially enclosed shed roof for both indoor and outdoor storage. Partial length shed roofs are also available.

OPEN

ENCLOSED

PARTIAL ENCLOSED

Model Options

Loft

Traditionally used for hay storage, barn lofts provide additional square footage for storage, workspace or recreation. Many of our models include a one-third, centered loft with the optional upgrade to two-thirds, and full sized lofts. Lofts engineered for living space are only included with select models. See website for further details.

- 1 - Full Loft**
- 2 - One-Thirds Loft**
- 3 - Two-Thirds Loft**
- 4 - Loft Apartment***

Ceiling & Walls

Models are presented without a ceiling treatment, leaving the roofing or flooring system exposed for a traditional barn look. Optional ceiling lining is offered in both Douglas fir and pine tongue and groove material and can be applied to the ceiling of the main building, breezeway and shed roof.

1 & 2 - Interior

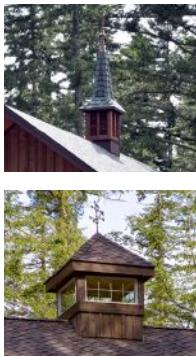

3 & 4 - Shed Roof

5 & 6 - Breezeway

Cupolas

The focal point of any barn silhouette is the cupola, and our selection of handcrafted and kit-build cupolas are offered fully-functional or as a decorative accent. Below are several examples of cupola combinations and treatments available as upgrade packages. See our website or the Barn and Home Add Ons section for more information.

Model Options

Your Barn Pros building can be tailored to meet your specific requirements for appearance, storage and function with the following option packages. Additional accessories can be found online at: www.BarnPros.com

Breezeway Doors

The traditional sliding breezeway doors included with most models are handmade using both tongue and groove and dimensional Douglas fir material (shown at right). Upgrade packages include wood doors with windows or an arched top, and a variety of steel-framed doors in several finishes and wood fill options. Full selection available online.

Hayloft Doors

Models offered with hayloft doors include a set of our handmade traditional triangle-top (shown right) or square design (shown below, left). Upgrade packages include our Classic steel-framed and powder-coated offering. See website for more details.

Dutch Doors & Windows

Horse stall packages include our handmade wood Dutch doors (shown right) with an option to upgrade to our Classic steel-framed and powder-coated line. Designs include sliding paddock doors, traditional Dutch doors and windows. View the full offering online.

Garage Doors

Add a garage door package to your building for convenient access to vehicle parking, farming implements, trailers and boats. Our garage doors are offered in several insulated designs chosen to complement your structure. For the full selection see our website.

Traditional Horse Stalls

Barn Pros offers a wide range of stall package choices to meet your needs and taste. Horse stall fronts, doors and divider grills are handmade in the US from heavy-duty, powder-coated galvanized steel and designed both for safety and heavy use. Choose from our standard offering or Classic stall packages. Additional information available online.

Multi-Use Barns

Walkers Mill Vineyard & Winery

www.walkersmill.com

We engineer versatility into all of our structures and that results in barns that are not only beautiful but functional. Our barns can be used for everything from equestrian hobbies to golf clubhouses and even breweries. One of the most often requested uses is for events. Take this beautiful Aryshire barn located in the heart of Texas as an example.

It was a lifelong dream for the owners of Walkers Mill Vineyard & Winery (below center and bottom right) to own and run a vineyard in their retirement. They knew they had to build a barn that would be functional for years to come and also fit naturally into the landscape without sacrificing their aesthetic tastes. They took one look at the style of our barns and immediately knew they were the perfect for their 74 acres outside an old saw mill community in Texas, which inspired the name. As their plans started coming together, their daughter got a glimpse of the designs and decided that she wanted to have her wedding in the barn. This only gave them less than 6 months to get their structure shipped and built which worked out perfectly given the efficiency of our kits. And after their daughter's joyous wedding, the owners' original dream came true with the first acre of vines planted.

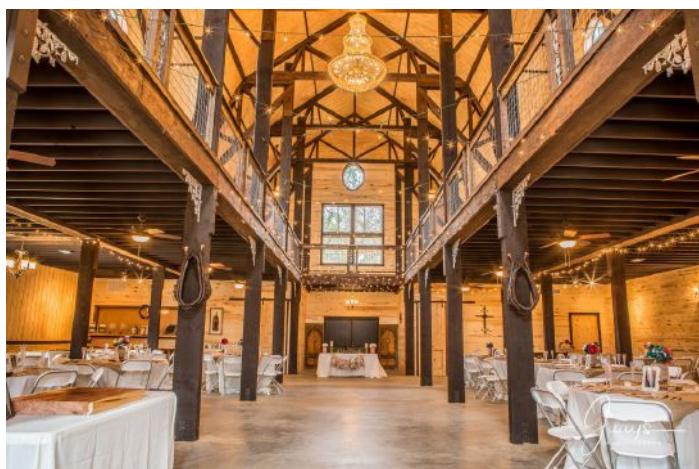

During this process, other friends and family got a peek at the barn and requesting to host their gatherings there as well. Seeing all of this interest, the owners converted the barn to be an event space. While they were initially drawn to Barn Pros because of the dramatic look of our barns, it was the versatility of our pre-engineered models that sold them on our structures. Specifically, the ability to place walls and windows where they are needed is one of the biggest benefits.

Noisy Water Winery

www.noisywaterwinery.com

Other customers who have purchased our structures for unique purposes have echoed this benefit. Noisy Water Winery, shown below at left, has been producing wine in the Sierra Blanca mountains for over a decade and recently acquired one of our structures to host events and community gatherings. They were able to build exactly what they needed to support the ways in which their business is growing.

For many customers, our barns may be the only structure they need. For some, like Noisy Water Winery, it may be just one structure among many. For these customers, it is important that they can create a similar feel and look across their entire property. That is why we offer so many different options for each of our structures. Every customer can let their unique personality shine through and make it their own. So whether you need a small shop on the outskirts of your property or you need a centerpiece that will take your customers' breath away, give us a call to get started at 866-844-2276.

Traditional Barn Doors

Traditional Barn Doors

These authentic barn doors are designed for both interior and exterior use and offer a unique focal point and rustic charm to any décor. The compact design is well suited where traditional open-swing doors are not an option, such as: kitchen pantries, laundry rooms, master bathrooms, walk-in closets and home offices. These doors are handmade using select grade Douglas fir lumber at our Pacific northwest facility and shipped fully assembled and unfinished.

Sliding track hardware packages are available in black with some designs offering a distressed finish as an option. These track packages include everything needed for installation: roller, track (including standoffs and lags), splice plates and stops.

Order your door in three simple steps:

1. Select your door style, choose from designs shown below.
2. Choose your dimensions. Widths are 36", 42" and 48" and heights are 81" and 85"
3. Sliding door hardware is an optional add-on, see facing page for styles offered. Note that the track length is predetermined by the door size and that some styles include an additional cost.

Available widths:

36", 42", 48"

Available heights:

81", 85"

Barn Pros has been providing authentic barn doors to our customers for over 25 years. Made in the US at our Pacific Northwest facility, each of these hand-crafted doors are made to order and shipped fully assembled, ready to hang.

Wash Bay Package

Wash Bay Package includes:

- 2"x6" T&G Walls, 10' (2)
- Cold Weather LED Light (2)
- Flood Light (2)
- Over-the-Top Washer
- Cross-Ties (1 pair)
- Rubber Stall Mat Kit

The only complete wash and groom stall package available on the market – brought to you by Barn Pros!

Items included in package:

Cold Weather LED Light

Product SKU: FL-4LED

This dust and moisture resistant 4' fixture provides an ample amount of light to your breezeway when spaced 12' apart. The low temperature energy-saving HD ballast requires no warm up time down to -20. Includes 40W LED light strip.

2" x 6" T&G Walls, 8' Tall

Product SKU: WP-103

Barn Pros lumber is made from premium grade Douglas Fir. The lumber is uniformly seasoned in dry kilns which improves strength and stiffness, enhances its appearance and increases its resistance to decay and attack of insects.

Over-the-Top Washer

Product SKU: HCP-OTT

This Barn Pros exclusive Wash Boom offers a safe washing experience for you and your horse, keeping the hose above your horse while bathing. Made to mount to an interior wall, this boom will adjust, swivel and extend to easily cover any part of our standard 12x12 wash bay package. This item includes assembly directions, mounting hardware, hose, hose fittings, and spray nozzle.

Flush Mount Flood Light

Product SKU: LD-001

The Slim Light Series features a 20 gauge, baked black enamel steel housing that is only 2 1/4" thick.

The lens is 3/16" clear tempered glass. 32W T8, 120-277 Volt. Bulbs not included.

12'x 12' Wash Bay Mat Kit, Pebble

Product SKU: WM-12

Pebble texture provides a non-slip surface and the flat underside leaves nowhere for urine to pool. The tight fit minimizes shifting, lifting, and sliding. Mats are 5/8" thick and made of 100% recycled vulcanized rubber. Kit includes 6 pieces.

Cross-Ties

Product SKU: CM-68

Rugged 2"x 4" steel mounting plates. Two mounting holes are provided on each plate. A 5/16" hot-rolled steel ring is hinged beneath the heavily-welded support loop. The 3/4" steel ring allows use of almost any type of cross-tie ends. Two per package.

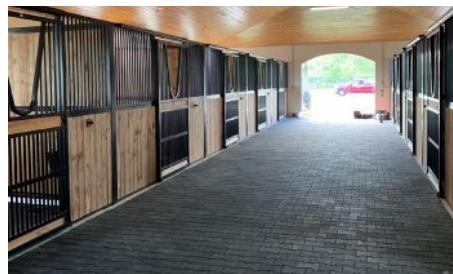

Pavers & Mats

Barn Pros is proud to offer Tru-Step® Pavers, a non-slip, interlocking rubber equine paver system which adds protection and safety to your aisles, stalls, breezeway or even patio! These durable and shock-absorbent pavers are weather, abrasion and chemical resistant, as well as resistant to wear and tear. Horses and riders alike benefit from the lack of cracking, warping or tearing over time, and can work easily on this surface even in wash stalls or entryways that are open to the elements. Lay Tru-Step® Pavers on concrete, asphalt, and compacted stone dust surfaces, among others. Please note that gray pavers are available in 1.5" only.

Rubber Pavers: 0.75" (20mm) thickness **sold per sq ft**
 1.5" (40mm) thickness **sold per sq ft**

Features:

- UV resistant
- Holds up in freezing/thawing conditions
- Interlocking design for stability
- Self-draining
- Easy installation and maintenance
- Low-cost and environmentally friendly
- Shock absorbing
- Safe footing in dry and wet conditions
- Controls bacteria and dust
- Available in three colors: terra cotta, black and grey (grey not available in 0.75")

For use in breezeways, walkways, grooming stalls and anywhere you need a safe surface for you and your horse. Pavers may be placed over concrete, asphalt and compacted stone.

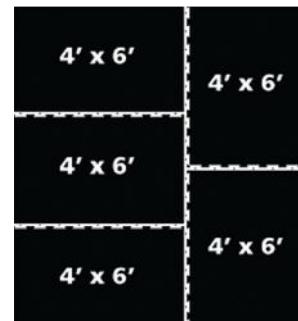

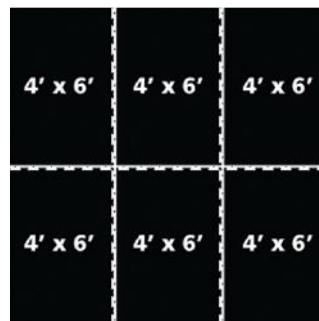

Universal Mats

Protect your horses joints while saving money on bedding. These 3/4" thick, 100% recycled vulcanized rubber mats are non-absorbent, will not fall apart or release toxins like other mats on the market. Choose from standard or interlocking edge for the tightest fitting system in the industry. Simple to install and maintain, kits available in standard stall sizes.

Rubber Stall Mat, 4'x6'

Product SKU: R-102

MAT SYSTEMS

Made using an ultrasonic cutting technology, this interlocking design is as close as possible to producing a single sheet of rubber that covers the entire stall floor. With this tight fit, shifting, lifting and sliding is minimized. Therefore, bedding and urine that gets under standard mats is reduced significantly. Easy to install and even easier to maintain, kits are available in standard sizes. Mats are 3/4" thick, 100% recycled vulcanized rubber.

Interlocking Stall Mat Kits

Non-Heated (no shroud), Product SKU: RW-SF:

Optional Stall Fount Shroud, Product SKU: RW-SF-SHD

B Stall Fount II

Heated unit includes trough and supply line heater, adjustable thermostat and insulated shroud to protect against freezing.

- Removable cover allows full access to trough and drain plug.
- Durable, fully insulated casing designed for rugged animal abuse helps to keep water cooler in the summer.
- Ideal for individual stalls or pens. Trough unit measures 14" L x 13" W
- Comes complete and ready to attach to your water and electric lines.
- Corner mount option featuring a stainless steel cover to prevent chewing.

Heated (includes shroud), Product SKU: RW-SF2H-GR-SHD

Non-Heated, Product SKU: RW-SF2-GR

Optional 30" Stall Fount II Shroud, Product SKU: RW-SF2-SHD-GR

Made of virtually indestructible FDA-approved molded polyurethane

Corner Feeder

Product SKU: NPC-001

This feeder allows horses to eat in their preferred natural grazing position at ground level. Made of virtually indestructible FDA-approved molded polyurethane, the main center section of the feeder will easily hold 20-30 lbs of hay. The side pans are designed to accommodate grain, salt and supplements and feature rounded inside corners for easy access. Measures 13" W in front with the depth tapering from 9" to 14" front to back. Feeder measures: 48½" x 28½" x 37" high in the rear corner, front height is 31¼". Color: Tan. Weight: 40 lbs.

Waterers & Feeders

WaterMatic150 - Pasture Fountain

You'll find top value, best performance, easiest operation and maintenance with the WaterMatic150. This pasture fountain features drop-in cover design, with the ease of finger lift service, and the insulation of the water seal. Drain plugs can be moved to the valve chamber openings for short-term trough shut-off during cleaning. Add the optional heating package to protect against freezing.

- Easy to maintain and clean
- No gaskets to crack, tear or leak
- One piece rugged fountain body
- Generous side access panel
- All surfaces slope to drains for easy clean out
- Ideal for a fence line application

Non-Heated

Product SKU: RW-WM150-Y (Yellow)

Product SKU: RW-WM150-G (Green)

OmniFount2 - Heated Pasture Fountain

The best of both worlds, the OmniFount2 blends technology from both traditional stainless steel units and the newest poly units to provide premier livestock fountains.

- Easy to maintain and clean
- Large panel for access to heating components and waterline
- Cable heater provides extra valve and supply line protection
- Insulated with highly energy efficient polyurethane foam, providing an r-factor of 7 per inch
- Water between 1-40 horses
- OmniFount unit comes ready to install to your electric and water lines.
- 4-3" x 5/8" stainless steel bolts recommended to anchor to concrete pad.

Product SKU: RW-OF2H-Y (Yellow)

Product SKU: RW-OF2H-G (Green)

iFEED Automatic Feed Dispenser

This revolutionary automatic feeder allows you to schedule multiple feedings on a portion-controlled, 24-hr cycle. The benefits: Feeding many small meals a day allows the horse to fully digest its food for maximum health, low stress and good behavior at mealtimes, and 20-30% less food waste. Measures 21"H x 9"W x 7"D, available in white or gray (shown).

iFEED Starter Kit

Product SKU: IF-KIT

This starter kit includes everything you need to start using the iFEED system. Contains: Feeder Unit, your choice of 8.5" or 10.5" funnel, 2-Amp Power Supply (powers up to 16 feeders) and all necessary hardware.

- Automatic feed dispenser for use inside or outside the stall
- Use for dispensing rolled, ground, whole grains and other concentrated feed 1/4" thick and 3/4" long
- Completely control time, frequency and quantity of feed.
- Set individual feed amounts for each horse
- Feed your horse from 1 to 720 portions in a 24 hour period
- The horse eats slowly and often, allowing the stomach and salivary glands to digest and absorb feed properly

iFEED components including additional dispenser units, feed funnels, feeder troughs and various power supply systems are available on our website, or by calling our Customer Service team at: 866-844-2276

Tack Organization

Classic Ultimate Tack System

The Ultimate Tack System is the ultimate answer to all your tack storage needs. (The Ultimate Baskets hang over any 2" rail.) Made from heavy duty 3/8" steel, the Ultimate Tack System can handle all types of tack from the lightest English saddles to the heaviest Western rigs.

Best of all, the Ultimate Tack System allows you to order any combination of components, so you can organize your tack, your way. Available in black, bronze or hunter-green powder-coated color finishes.

A Ultimate Tack Rack System

Product SKU:UTS-CS

The Ultimate Tack System contains:

5 Ultimate Tack System Frames

4 Saddle Racks

5 Ultimate Large Baskets

2 Ultimate Small Baskets

2 Ultimate Saddle Pad Racks (10 pads total, each rack holds 5.)

Buy the package and save!

B Ultimate Frame

Product SKU:UTS-FR

Use with any Ultimate Tack System component to provide great storage solutions anywhere in your tack room or trailer. 17.5"W x 56.25"H

C Ultimate Saddle Rack

Product SKU:UTS-SR

Designed to hold English or Western saddle, and made of 3/8" galvanized steel.

Select from bronze, hunter green, or black powder coating.

Classic Hitching Posts with solid brass caps

Product SKU: CE-HP6 61"

Available as surface mount or inground. In-ground mount shown.

D Ultimate Saddle Pad Rack

Product SKU:UTS-BR

Horse head design keeps pad off ground and aids in airing them out. Holds up to five saddle pads.

E Ultimate Basket

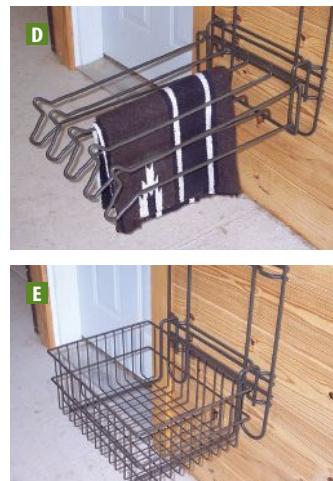

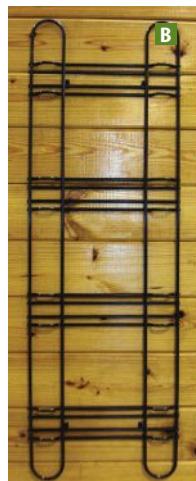

Perfect for holding all those extras a groom needs and easily removable for carry and go convenience.

Large Basket

Product SKU:UTS-LB
18"W x 13"D x 8"H

Small Basket

Product SKU:UTS-SB
19"W x 6.5"D x 7"H

Classic Hitching Posts with solid brass caps

Product SKU: CE-HP6 61"

Available as surface mount or inground. In-ground mount shown.

Classic Bridle-Halter Hanger

Product SKU: CE-BHB
with brass cap

Product SKU: CE-BHP
with powder-coated cap

Classic Blanket Rack

Product SKU: CE-BR

When not in use, the blanket bars can lay flat against the wall. Easy accessibility and great for ventilation. Bolts to the wall. Holds five blankets or pads. Available in galvanized or any of our standard powder-coated colors.

Mounting Steps

Constructed of lightweight UV stabilized polyethylene. Available in forest green, blue, red, tan, ash gray, black, purple and pink.

2-Step - Measures 26" L x 15" W x 19" H

Product SKU: MS-19

3-Step - Measures 31½" L x 18" W x 22½" H

Product SKU: MS-22

Lighting & Fans

Illuminate your barn, arena, home exterior, interior breezeway, stall or wash bay with these top quality products.

Heavy Duty Cold Weather Overhead Light

This 4' long fixture provides ample light for your barn or shop when spaced 12' apart. Sealed high-impact lens, dust and moisture resistant. Energy-saving HD ballast requires no warm-up time.

Flourescent - Includes two (2), T5-HO lamps.
Bulbs not included.

Product SKU: FL-4

LED - Includes 40W LED light strip.
Product SKU: FL-4LED

Flush Mount Flood Light

The Slim Light Series features a 20 gauge, baked black enamel steel housing that is only 2 1/4" thick. The lens is 3/16" clear tempered glass. 32W, T5-HO, Bulbs not included. 120-277 Volt.

Product SKU: LD-001

Industrial Circulator Fans

These high-velocity bracket mounted industrial fans can be positioned horizontally or vertically for precise air flow direction. A permanent split capacitor (PSC) motor provides starting torque and the ability to run at variable speeds. The motor is totally enclosed, making it suitable for use in barns, shops and locations where dust or other airborne debris are present. Industrial fans work more efficiently, are quieter and more powerful than standard cage fans.

24" Wall Mounted Fan

1/4hp, 2 speeds, 120V, 2.5 amps, 5000 RPM. Housing diameter 27"
Product SKU: TF-WM24

20" Wall Mounted Fan

1/4hp, 2 speeds, 120V, 2.4 amps, 4100 RPM. Housing diameter 22"
Product SKU: TF-WM20

Optional Ceiling Mount Kit

Product SKU: TF-CM

- Fully enclosed, permanently lubricated
- OSHA compliant finger guards
- Steel hub / spider aluminum paddle blades
- SJT type 3 conductor, 12' long cord
- Use on non-sweating animals to improve their comfort level

Heavy-duty – ideal for damp or wet locations

Arena and Shop High Bay Lighting

Our Fluorescent T5HO High Bay Fixtures provide nearly equal light output to metal halide, while using 50% less energy. Other advantages:

- Heavy-duty cold weather ballasts (perform in temperatures down to -20 degrees F) provide instant illumination (no warm up period)
- Equipped with safety lens
- Average lamp life of 20,000 hours
- Variety of flexible and easy mounting options
- Voltage sensing ballasts come standard, which allows the fixture to run off any voltage from 120V to 277V

C 4 bulb fixture

46 1/4" L x 15" W x 4 1/2" H

Product SKU: LD-236

D 4 bulb fixture for damp/wet locations

52" L x 15" W x 6 1/2" H

Product SKU: LD-379

Ask one of our experienced specialists about customizing your lighting package for your arena or shop. **Bulbs not included.**

Cupolas

Our Barn Pros cupolas are crafted by hand, using Northwest Cedar from the Pacific Northwest. Most are fully functioning and louvered for maximum ventilation. Barn Pros has designed a universal base, so your cupola choice can easily adapt to any roof pitch. Most barns look great with a single cupola on the roofline. Though, large buildings with over 48' of roofline will look best with more than one: consider combining a jumbo or Lighthouse model with two standard cupolas. Roofing material is not included and assembly may be required.

Proudly
manufactured in
the USA

Standard Cupola

Product SKU: C-101-B

Measures: 54"H x 40"W x 50"D

**Mini Cupola**

Product SKU: C-100

Measures: 30"H x 18.5"W x 18.5"D

**Jumbo Cupola Kit (Non-ventilating, requires assembly) *not shown**

Product SKU: C-102

Measures: 66"H x 47"W x 61"D

**Triple Cupola**

Product SKU: C-103

Measures: 84"H x 48"W x 118"D

Garage Doors

Your garage door is typically one of the most prominent visual features on your barn, home or shop. However, your garage needs to be more than just attractive; it should complement your structure with beauty and functionality. Our garage doors do just that.

Decorative hardware kit included.

Therma Tech Garage Door

This insulated steel door utilizes a sandwich construction method where two layers of high-quality steel and solid EPS (expanded polystyrene) create a barrier of protection from the weather plus additional security for your barn, home or shop. Bright white garage door features 8-panel window design, woodgrain embossed carriage panels and decorative hardware kit. Garage door opener and keyless entry kit included with every order.

Therma Tech Stockton Carriage Garage Door

10'W x 7'6"H	SKU: BP-NWD-TT1

VersiGrid

A permanent paddock solution for muddy grounds.

Available by the layer and by the pallet. One layer weighs 15 lbs and covers an area of 12 sq. ft. (36" x 48"). One pallet has 60 layers, weighs 1000 lbs, covers 720 sq. ft.

STANDARD (1.5" thickness)

Single layer - Covers: 12 sq. ft. (36" x 48"), Weight: 15 lbs.
Product SKU: VERSIGRID-1.5L

Pallet, 60 layers - Covers: 720 sq. ft., Weight: 1,020 lbs.
Product SKU: VERSIGRID-1.5P

HEAVY DUTY (2" thickness)

Single layer - Weight: 27 lbs., Covers: 12 sq. ft. (36" x 48")
Product SKU: VERSIGRID-2.0L

Pallet, 45 layers - Covers: 540 sq. ft., Weight: 1,250 lbs.
Product SKU: VERSIGRID-2.0P

Have a usable paddock 365 days a year! VersiGrid® is a permanent paddock solution – it is environmentally friendly and a permeable solution for muddy grounds. Use VersiGrid for indoor or outdoor arenas, round pens, paddocks, turnouts, barn aisle-ways, washing areas, driveways, parking, grass or gravel areas, ramp or slope soil stabilization, terra forming/landscaping, grass protection from traffic damage.

VersiGrid® Soil Stabilization

VersiGrid® is the original equestrian footing and flooring grid system, American-engineered and manufactured in the USA.

With a load-bearing capacity of up to 30,000 lbs per square foot. Working on the “snow shoe principle,” the grids disperse the weight over a larger surface area (effectively, 689 square inches for a four legged animal). The grids permanently separate the top layer from the ground sub-base, preventing intermingling of the layers. In many conditions, no foundation work is required. It's strong, 100% recycled, and flexible! Manufactured from post-consumer reinforced LDPE (Polyethylene). It is able to withstand climate extremes from -30 to +180 degrees Fahrenheit while remaining flexible.

VersiGrid is the original equestrian footing and flooring grid system. It is the most successful soil stabilization system available, widely tested and applied worldwide for years in the livestock and equine industries.

Pasture Shelters

Pasture Barn

When you need a simple, elegant shelter for your horse, our new Pasture Barn is ideal! Its timber-frame style construction is adaptable for most building sites – even if the ground is not perfectly level. Raise this little barn over a weekend, thanks to the easy-to-follow instructions and pre-built/precut components.

Pasture Barn Features

- 12' x 12' (144 sq ft). Does not require a building permit in most cases. Please check with your local building department.
- Pre-built trusses with pre-assembled purlin cleats
- 2" x 6" tongue and groove select-grade siding
- Northwest Cedar trim and fascia
- 6" x 6" structural pressure-treated posts
- Barn Pros Universal Roof System: 2" x 8" purlins w 7/16 OSB
- Roof system will accommodate customer-supplied roofing material of choice.
- This structure is modular – buy two or more and build end-to-end!
- Stall Package includes premium, galvanized stall front with track, trolleys hardware, and rubber mat kit (optional hunter green or black powder coating for stall fronts).

Build two or more side-by-side to accommodate an additional horse or to hay and supplies.

Our Pasture Barn design is flexible – place the stall front on any side, or have an open structure.

Pasture Shelter

Designed and built to protect your animals during all four seasons of the year. These pasture shelters provide a warm dry shelter through the fall and winter and a cool shaded retreat during spring and summer months. Shelters are manufactured with heavy 15 gauge Round Galvanized Steel Tube milled to our specifications and are made right here in the USA. When properly erected and anchored, these shelters are engineered to withstand a 30lb. per square foot snow load and a 90 mph wind. Shelters have a galvanized finish for unequalled rust protection. All shelters include Anchor Kit. Wood for panels and roofing material not included.

- Great weather protection for your animals
- Superior strength
- Fully engineered
- Expandable, modular design
- Quick & easy to erect

A 6' Side Feed Room Feed Door Shelter

Measures: 18'W x 12'D x 8'H front (7'H rear) with 2' roof overhang. Feed room is 6'W and includes two 4' doors and feeder window.

Product SKU: NPS-03

Solid Side & Back Shelters

Measures: 12'W x 12'D x 8'H front (7'H rear) with 2' roof overhang.

Composting Systems

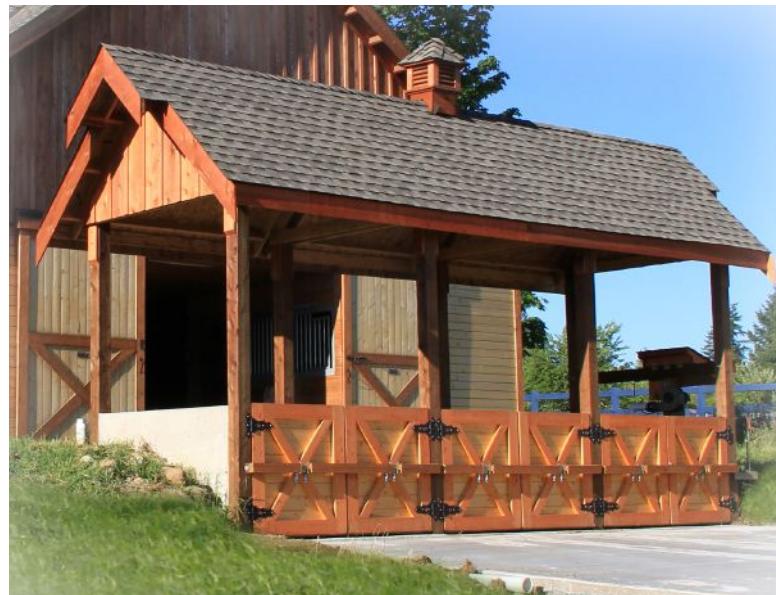

Barn Pros Paragon Composting System

Barn Pros has forged an exclusive working relationship with O2Compost, a leading organic waste management company. Together they provide a viable sustainable solution to the smelly and problematic issue of horse manure: The Paragon Composting System by Barn Pros and O2Compost.

The Paragon Composting System

The key to Paragon's success is aerated composting.

- Fresh air (i.e. oxygen) is introduced throughout the mix of materials using an electric blower, powered by standard electricity or off-grid solar power. The blower, along with an accompanying timer, comes with a lifetime warranty.
- With this compost system, pile temperatures are sufficient to destroy parasites and pathogens in the mix, which eliminates offensive odors.
- High temperatures also destroy fly larvae and weed seeds, improving your horses' health and yielding a safe, high-quality finished product.
- Aeration greatly expedites the composting process and lends itself to a true flow-through process, thereby eliminating the "2-year pile syndrome." All of this takes place in 30 to 60 days, without turning the compost pile.

"As horse owners, we know that large animals have an impact on the environment. The Paragon System lessens that negative impact."

C. Portmann, Snohomish WA

The Paragon Composting System is offered in an 8' x 24' three-bay, or 8' x 36' four-bay setup. Shown left is the three-bay, four-bay shown below. Ask about additional Paragon composting systems that can handle manure from ten to 100 horses. Visit our website, or call our Customer Service team for more information.

Paragon Composting Systems

Three bay: Product SKU: PCS3

Four bay: Product SKU: PCS4

The Paragon Composting System includes the following items:

- A complete operations manual with step-by-step instructions
- Complete set of blueprints
- Unlimited technical support through O2Compost (design, construction, start-up, long-term operations)
- 8'x 24' and 8'x 32' with 8'x 8' bays
- 10' to eaves
- 12/12 gable roof
- Pre-built wood trusses with purlin cleats
- 2" x 8" purlins with OSB roof sheeting
- PT interior / Douglas Fir exterior
- Gates or removable tongue & groove wall for easy unloading
- Cedar cupola
- One 1/2 - horsepower, high-pressure / high-volume electric steel blower
- One variable setting cycle timer to operate the blower
- Gate valve assemblies
- One 36-inch long temperature probe
- 25# snow load / 80 MPH wind load
- Exposure B • Seismic 3
- 110V / 15 Amp

Available in top-down (sloping ground) and on-grade (flat ground) configurations. Customer supplies concrete, nails, roofing, and PVC pipe.

Aerated compost supports healthy plant growth. Compost also retains water extremely well, resulting in improved drought resistance, a longer growing season, and reduced soil erosion. The micro-organisms within the compost help suppress plant pathogens.

Ask about our large Paragon composting systems that can handle manure from ten to 100 horses.

Lumber

Decades of sourcing the best materials for our structures have given us the experience to find the right lumber at the right price for your job. That's why we only sell the materials we use every day, they're the ones we specialize in and know the best. From full lumber packages for new home construction to a few cedar boards for a garden trellis, we cater to orders of all sizes. If you are a professional contractor, a seasoned builder, an architect or a DIY home improvement enthusiast – our team is ready to help.

If you're unsure where to start, call and speak to one of our specialists. If you're ready to place an order, simply send us a material list and we'll get started on your quote. Browse the complete selection online.

Tongue and Groove boards

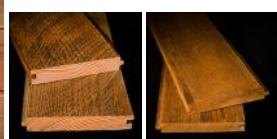

Milled exclusively for Barn Pros, our Douglas fir tongue and groove lumber is graded on both sides so that it can be appreciated from any angle. This specialty material is kiln-dried to improve strength, enhance the appearance and increase resistance to decay and insect damage. Ask about our AquaFir and Ranchwood T&G lumber – a pre-finished option using non-VOC sealer and stained or distressed in your color choice. By comparison, this material can be installed immediately saving time and labor costs.

2X6 and 1X6
Doug Fir T&G Boards

Pre-finished 2X6 and 1X6
Doug Fir T&G Boards:
AquaFir - color tinted
Ranchwood - rustic barn lumber

Add warmth and beauty to exteriors, soffits, ceilings, walls and floors with tongue and groove boards.

Timber Accents

Our hand-constructed Douglas Fir timber accents create a traditional look for any barn. Timber Truss packages include: pre-built timber truss (5/12 to 12/12 pitches available), two pre-built 6" x 6" triangle truss supports, pre-built corbels, and angle iron truss mounts with hardware. *Additional outriggers/corbels sold separately.

Timber Truss Package

4" x 4" Corbel

SKU: BP-C4, 25.5"H x 16"L

6" x 6" Corbel

SKU: BP-C6, 36"H x 25)L

Board and Batten boards

Our Northwest cedar is old growth with a tight grain pattern found in the highest quality material. Above (top) is an example of a cedar board and batten application using 1" by 10" boards and 1" by 3" battens.

Above (bottom) is an example of pre-finished Ranchwood board and batten material in a similar application.

Posts & Timbers

Douglas fir posts (above, left and lower right) are prized for their strength-to-weight ratio, straight grain, warm color tones and are often used as structural supports.

Our tight knot, Northwest cedar timbers and beams (above, right) are prized for their strength and beauty and are used in both indoor and outdoor applications.

Treated posts are ideal for permanent wood foundations like those used in post-and-beam construction.

ORDER INFORMATION

To order, call toll free: 1-866-844-2276

Monday - Friday, 7:00 am - 5:00 pm PST

Shop online at: www.barnpros.com

Payment options include all major credit cards, money orders and electronic bank transfers.

Free Shipping Offer for Exclusive Barn Models:

Applicable within the contiguous US though exclusions apply and could include, but are not limited to: transfers, road permits, ferry rates, tolls, equipment rental for unloading, custom orders and some specialty items. Please inquire about specific delivery to your site.

Accessory Order Shipping Information:

We ship your order using the most economical and efficient method. All orders are shipped either directly from Barn Pros' warehouse location or a manufacturer drop-ship location. Shipping rates are calculated by both weight and size per package/item individually, before being added to customer's order. Please contact our customer service team for rates, lead times and additional questions.

Standard Ground Shipments:

Most orders under 110 pounds that do not exceed 8 ft. in length are shipped via ground transportation by either UPS or USPS.

Truck Freight Shipments:

Orders shipped via freight require purchaser (or person(s) designated by purchaser) be present for delivery to accept and off-load shipment. A delivery appointment will be scheduled with the carrier in advance. Some orders may be unloaded by hand; carriers provide a lift gate in some cases. Large orders may require the use of a forklift (at purchaser's expense) available through a local rental company.

Sales Tax

Deliveries to Washington State are subject to applicable sales tax. International deliveries do not include any applicable duty, value-added taxes (VAT), or import consumption taxes which are the responsibility of the customer.

Allow up to 4-6 weeks for delivery.

Damages & Shortages

Please inspect shipment upon receipt of your order. Note any changes, shortages, overages, or damage on the bill of lading. For further assistance, contact Barn Pros customer service at 866-844-2276. Photos are always helpful for damaged shipment claims. Failure to report and/or note discrepancies or damages on the bill of lading at time of delivery will prevent filing of your claim. All claims must be made within 24 hours of delivery.

Pricing & Content

Our aim is to guarantee the pricing in this catalog, though it should be noted that prices are subject to change without notice. For the most up to date pricing please reference our website as current online pricing supersedes all previous prices. All pricing is in U.S. dollars and does not include shipping and handling charges.

Barn Pros reserves the right to correct any errors, inaccuracies or omissions that may relate to product description, images, pricing and/or availability at any time without prior notice (including after an order has been placed). While such instances are rare, we do apologize for any inconvenience.

Warranties

When applicable, products not manufactured by Barn Pros are warranted by the manufacturer. Neither Barn Pros nor the manufacturer may be held responsible for customer misuse of merchandise. Please contact our customer service team at 866-844-2276 with additional questions.

Returns

If you require a return of merchandise, please contact our customer service team at 866-844-2276 and we will help you with the process. Items eligible for return are subject to a 20% restocking fee, must be in original packaging and sellable condition. Please note that special order drop ship items and custom merchandise may not be returnable. Any and all fees incurred with returns are the sole responsibility of the customer, which may include but is not limited to: shipping, freight, load or unload, packaging, carrier, fees and charges.
